What is Assistive Technology?

- United States Assistive Technology Act (1998)
 - Any “product, device, or equipment, whether acquired commercially, modified or customized, that is used to maintain, increase, or improve the functional capabilities of individuals with disabilities.”
- WHO Global Cooperation on Assistive Technology (GATE)
 - A subset of health technology, refers to assistive products and related systems and services developed for people to maintain or improve functioning and thereby promote well-being. It enables people with difficulties in functioning to live healthy, productive, independent and dignified lives, participating in education, the labour market and social life.

Assistive Technology..... Then and Now

THEN...

NOW...

FUTURE?

AT is an enabler. We are all using it, not just Persons with Disabilities

Specialised Assistive Technology for Visually Impaired

Low
Vision

High
contrast,
large font
keyboard

Magnifiers

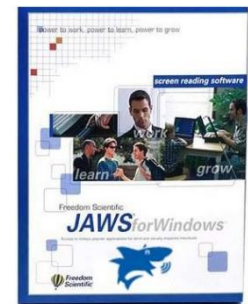

Blindness

Refreshable
Braille display
and keyboard

Optical Character
Recognition
(OCR) scanner

Screen readers

Specialised Assistive Technology for Hearing Impaired

Induction loop

Wireless microphone and receiver

Boundaries Are Blurring

- Mainstream technologies is adopting Universal Design to make them accessible to all
- Assistive technologies is leveraging on mainstream technology platform for lower cost and better distribution
- Combination of assistive technologies and mainstream technologies allow persons with disabilities to work, live and play just like any other persons without disabilities

What Lies Beneath..... Is Accessibility

Accessibility OS X iOS watchOS tvOS Third-Party Resources

iOS. A wide range of features for a wide range of needs.

Intuitive by design, iPhone, iPad and iPod touch also come with assistive features that allow people with disabilities to experience the fun and function of iOS. With these innovative technologies built in, iOS devices become powerful and affordable assistive devices.

-  Vision
-  Hearing
-  Physical and Motor Skills
-  Learning and Literacy

Accessibility can empower

every person and every organization on the planet to achieve more, whether your personal limits last a day or a lifetime.

Christopher Hills – The Power of One Switch

Source: <https://www.youtube.com/watch?v=JtVzcZyv748>

Nothing Is Impossible

Christopher Hills is a master video producer and editor from Sunshine Coast, Queensland, Australia.

Hills lives with cerebral palsy and quadriplegia, and relies on technology and software he can control with a button located at the back of his wheelchair headrest.

Tapping the button with his head allows Hills to toggle through screens, surf the web, and edit video content.

Having qualified as an Apple Certified Professional in editing software Final Cut Pro X and completed Video Production with RMIT University, Hills has started his own business, Switched-On Video Editing.

"I have created a series of YouTube videos about the intersection between Technology and disability," he said.

How to select AT?

SETT

Self. Environment. Task. Technology.

Multiple considerations

LEARNER ATTRIBUTES:

- PHYSICAL**
sensory, mobility, manipulative
- LEARNING**
reading, numerical, conceptual, organization, attention
- COGNITIVE**
reasoning, visual/verbal, big picture/details, problem-solving!

A Spectrum of Abilities

- LANGUAGE/COMMUNICATION**
English Language Learner, speaking & presenting
- SOCIAL/EMOTIONAL**
impulse control, aggression/passivity, depression/hyperactivity, working with others
- EXPERIENCE**
foundation for learning

Have scooter, will travel

方先生 | 受惠体障人士

我很期待因为我要学一点东西 有东西做 老板看得起就好了

Mr Poon

- Stroke survivor
- Not able to ambulate independently in the community before getting his scooter
- Able to travel independently using the scooter and managed to secure a job as a kitchen staff (support) in a Thai restaurant to do food preparation

Getting back to work with some AT help

Ms Ziana, has visual impairment

- Glaucoma and tunnel vision
- Found an admin job which requires her to do reading and report analysis;
- Went through AT assessment – Open Book + Pearl Camera or JAWS was recommended to assist her in performing the tasks

Mr Norman, has physical disability

- Amputee with prosthetic legs
- Found an operation assistant job where the working environment is not wheelchair friendly
- Used wheelchair to move around in the community and prosthetic leg to transport himself to office

Mr Ng, has physical disability

- Amputee with prosthetic leg;
- Found a sales job and bought a modified car with left foot pedal for accelerator to move around

TECH ABLE

ENABLING THROUGH ASSISTIVE TECHNOLOGY

Welcome to Tech Able

AT resource centre that promotes awareness and adoption of AT

Enabling Innovation Centre

 **ST Engineering**
Enabling Technology Centre

Provides information and resources on assistive and infocomm technologies (IT)

Promotes the adoption of AT/IT among persons with disabilities and employers

Leverages technology for more training and employment opportunities for persons with disabilities

Located at the Enabling Village, Tech Able is an integrated assistive technology space that is jointly managed by SG Enable and SPD.

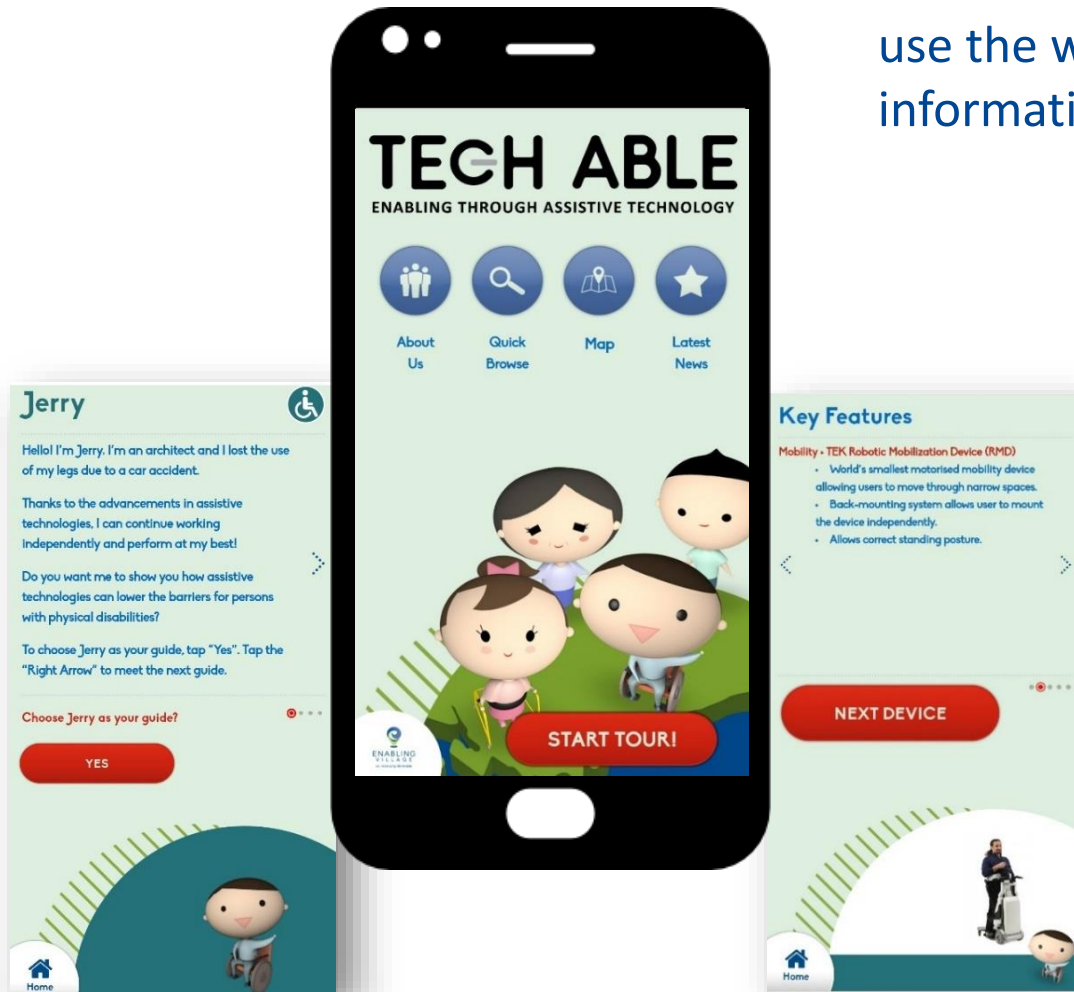

SG ENABLE
Inclusive society, Enabled lives.

SPD Serving people with disabilities since 1964

SG ENABLE

Tech Able Web App

Visitors to Tech Able are encouraged to use the web application to find out more information as they self-explore Tech Able
